

DIY GARDEN MARKERS

SUPPLY LIST

1. Paint stirring sticks (*free from the home improvement store.*)
2. Paint (*acrylics work well*)
3. White Paint Pen
4. Sealant (*optional, but since your plant markers will be outside, they will last a lot longer if you seal them.*)

SIMPLE STEPS

1. Paint sticks in desired colors (*about as far as the sticks would poke out of the ground for simplicity's sake.*)
2. Allow to dry. Apply a second coat for complete coverage.
3. Once dry, use the paint pen to label the marker with the plant name.
4. Allow to dry completely and then apply sealant. Use a second coat if desired.
5. Once dry, stick the markers in the ground with your plants.
